Category Mapping

Category mapping is the process of deciding in which category you want to list products on walmart.com. The category to which you will map your product, the product will be shown under that category. It is very important to map the product in right category. Unless and until you map the category, the products will not get listed on our app.

Map the category of all product types that you had created on your shopify store. Map those product types to the walmart category in which you want to list your product.

To do the category mapping [click here](#)

Shopify-Walmart Category Mapping

[Help](#)[Submit](#)

Id	Product Type(shopify)	Walmart Tax Code (CLICK HERE TO GET TAXCODE)	Walmart Category Name	
1	13feb	<input type="text" value="2037769"/>	<input type="text" value="Clothing"/>	<input type="text" value="Other"/>
2	1febev	<input type="text"/>	<input type="text" value="Clothing"/>	<input type="text" value="Other"/>
3	1febev	<input type="text"/>	<input type="text" value="Clothing"/>	<input type="text" value="Other"/>
4	6feb	<input type="text"/>	<input type="text" value="Please Select Category"/>	
5	9feb	<input type="text"/>	<input type="text" value="Electronics"/>	<input type="text" value="Cell Phones"/>
